Software Engineering graduate with 1+ year of practical experience developing web and mobile applications using Python, Java, JavaScript, TypeScript, React, and FastAPI. Experienced in APIs, databases, system integration, debugging, and AI-assisted development tools. Strong problem-solving and teamwork skills, with a focus on building secure, reliable, and efficient software solutions.

WORK EXPERIENCE

Full-Stack Developer
Algebra technologies

06/2025 - 06/2026 *Highlands - Zimbabwe*

Algebra Technologies is a Zimbabwe-based software company. They help businesses leverage tech for growth.

Achievements/Tasks

- Collaborated with a senior developer on Astro Pay payment/loan app and a government website's (LCR).
- Created business emails, implemented online/offline user status indicators, and managed loading windows.
- Developed a Prepaid Lock App for admin device management. The app captures IMEI, location, and serial number, and tracks activated devices. It increments.
- balance bips in a linked dashboard. Admins can activate or deactivate devices remotely to ensure secure management.
